Bulandshahr, Uttar Pradesh | +91-8218094347 | gaurritika56@gmail.com | LinkedIn | GitHub | LeetCode

Education

G.L. Bajaj Institute of Technology and Management — Greater Noida
Bachelor of Technology in Computer Science Engineering; CGPA: 8.35 — *2023 – 2027*

Azad Public School — Bulandshahr
Class XII; 93.2% — *2021 – 2022*

Saint Momina School — Bulandshahr
Class X; 91.2% — *2019 – 2020*

Projects

Bug Triage Agent | *FastAPI, OpenAI API, Pytest*

- Built a FastAPI-based bug triage system using LangGraph with a modular backend architecture.
- Implemented Retrieval-Augmented Generation (RAG) to retrieve similar historical bug reports and generate context-aware resolution suggestions.
- Integrated Pytest-based testing, structured REST APIs, error handling, and human-in-the-loop approval for reliable ticket processing.

Pollination Activity Detector | *Python, XGBoost, Streamlit, Open-Meteo API*

- Developed an end-to-end machine learning pipeline using XGBoost to classify pollination activity, achieving 82% Accuracy and 82% Weighted F1-Score.
- Performed data preprocessing, feature engineering, one-hot encoding, feature scaling, and model persistence using Joblib.
- Integrated the Open-Meteo API to fetch real-time weather data for location-based predictions.
- Built an interactive Streamlit dashboard with geospatial visualization for real-time environmental monitoring.

CuraID | *HTML, CSS, JavaScript, Firebase, RFID/NFC*

- Developed a healthcare portal enabling instant patient record access using RFID/NFC technology.
- Integrated Firebase Authentication and Realtime Database for secure storage and retrieval of patient information.
- Enabled real-time access to diagnoses, medications, allergies, and visit history through a responsive interface.
- Reduced manual record handling and improved emergency response efficiency through digitized healthcare records.

Technical Skills

Languages: C, C++, Python, SQL
Frontend: HTML, CSS
Backend: FastAPI, REST APIs, Pytest
System Skills: Linux, Shell Scripting (Basics), Git Version Control, Debugging
AI & Machine Learning: LangChain, Retrieval-Augmented Generation (RAG), Generative AI, Feature Engineering, Model Evaluation
Tools & Platforms: Linux (Ubuntu), Git, GitHub, MySQL, Streamlit
Core Concepts: Data Structures & Algorithms, Operating Systems (Processes, Threads, Memory Management, File Systems), Computer Networks, DBMS, Object-Oriented Programming
Version Control: Git, GitHub

Leadership & Achievements

- Selected for the Cisco BOOST Program 2026, focused on networking, cybersecurity, mentorship, and professional development.
- Selected through institute-level screening rounds for the Smart India Hackathon (SIH).

Certifications

- **Cisco Python Essentials** – Levels 1 & 2
- **Cisco CCNA** – Modules 1, 2 & 3
